Steroid Injection Versus NSAID Injection for Trigger Finger: A Comparative Study of Early Outcomes

Hussain Shakeel MBBS, T. Sara Ahmad MBBS

Department of Orthopedic Surgery, University of Malaya, Kuala Lumpur, Malaysia

Received 28 August 2010. Accepted 23 March 2012. Available online 19 June 2012.

Purpose

Methods

In this prospective, randomized, double-blind, controlled study of trigger fingers, subjects injected either with steroid or NSAID. The outcomes measured included pain, function, and recurrence at 6 weeks and 6 months post-injection.
