Subject: Your Submission - Editor Decision: ACCEPT
To: <cmvwaran@gmail.com>

ACCEPTANCE NOTIFICATION
Ms. Ref. No.: WNS-18-3032R1
Title: Frequency and Causes of Line of Sight Issues During Neurosurgical Procedures Using Optical Image Guided Systems

Dear Professor viknes waran,

It is a distinct pleasure to tell you that your manuscript has been accepted for publication. You will shortly start to receive emails from our Production department updating you on the proofing process for your manuscript and asking you to complete the Elsevier publishing forms. The Accepted Manuscript PDF of all full-length articles will be posted online around 1 week after acceptance and will be indexed on PubMed.

Your article will be copyedited and typeset, and your proof should be sent to you 2-3 weeks after acceptance. When you receive the page proofs, please return your corrections promptly. Articles with authors' corrections will be released electronically as soon as possible, in advance of their publication in a specific issue of WORLD NEUROSURGERY.

NOTE: Once you receive your proofs, please make sure you read over your paper VERY CAREFULLY because it is your only chance to make any changes to it. Once you resubmit your final corrections/changes made on the uncorrected proof, your paper will then be published soon after online via Science Direct and at that point may be legitimately cited and the final PubMed entry will be created.
