INTRODUCTION
Elaine Morais

1. COGNITION AND LANGUAGE
   Bjorn Jernudd

2. LANGUAGE AND THE BODY: THREE YEARS OF A PHYSIOTHERAPIST
   Asmah Haji Omar

3. STRATEGIES MALAY TO CONVEY MEANING IN ENCODING TEMPERATURE
   Karen Kow Yip Cheng

4. BILINGUAL CHILDHOOD: STRATEGIES TO CONVEY MEANING IN ENCODING TEMPERATURE
   Rachel Tan Siew Kwan

5. HESITATION PHENOMENA IN MALAY: A CASE STUDY
   Stefanie Pillai

6. SOCIOCOGNITION AND LANGUAGE: LETTERS TO THE EDITOR
   Azirah Hashim

7. A PRELIMINARY INVESTIGATION ON DOCTOR-PATIENT COMMUNICATION: AN OUTPATIENT CLINIC
   Evelyn Khor Sook Hiang
8. DYSLEXIA: CAUSES, PROBLEMS AND SOLUTIONS
   Mac Yin Mee

9. TOWARDS A DEFINITION OF "EFFECTIVENESS"
   IN TECHNICAL REPORTS
   Rajeswary Sargunan

10. THE INFLUENCE OF CULTURE
     ON COMPLIMENT RESPONSES
     Thilagavathi Shanmuganathan

11. TRANSITIVITY AND COGNITION:
     LOOKING BEYOND THE SURFACE
     OF CHEMISTRY TEXTS
     Sridevi Srinivas

12. SPOKEN DISCOURSE AND THE NOTION
     OF THE TONE GROUP: REALITY OR MYTH?
     Zuraidah Mohd. Don

13. LANGUAGE AND INTUITION IN MACHINES:
     A CONTRADICTION IN TERMS?
     Rosli Omar

Universiti Teknologi Malaysia

The International Conference on Language and Intuition in Machines was held by the Faculty of Languages, Universiti Teknologi Malaysia, from 14th to 16th July 2000. The conference attracted participants from a wide range of disciplines, including linguists, language specialists, cognitive scientists, and interested professionals, with a diverse mix of views and ideas. This is in line with the increasing interest in the study of language and cognition among Malaysians on the use of intuitions in language processing and learning.

As we are well aware, the speed of scientific research, especially in the fields of language and cognition, is accelerating. In June 2000, scientists announced the discovery of a new genetic code. They called it “The Genetic Code.” This discovery has paved the way for better understanding the functions of genes and the relationships between genes and specific diseases. It is hoped that this new genetic information will help researchers to better understand the causes of language disorders and to develop effective treatments for them.

The conference papers presented at the conference included a diverse range of topics, from the theoretical foundations of language and cognition to practical applications in language processing and learning.

The conference was a great success, with a venue for the presenters and attendees to interact and exchange ideas. The conference has set a new benchmark for future conferences in the field of language and cognition.

Conferences of this kind are essential for the advancement of knowledge and understanding in the field of language and cognition. They provide a platform for researchers to present their findings, exchange ideas, and network with other researchers in the field. The success of this conference has demonstrated the importance of such events in promoting the advancement of knowledge and understanding in the field of language and cognition.
