Efficacy and tolerability of micronized purified flavonoid fractions (MPFF) for haemorrhoids: A systematic review and meta-analysis

Zorah Aziz *, Weng Khai Hui *, Muhammad Danish Badrul Hisham Yaacob, Wei Ling Tang, Sadah Yaacob

https://doi.org/10.1016/j.ctim.2018.05.011

Highlights

- Current evidence does not show MPFF has significant effects on haemorrhoid symptoms of pain and itching.
- Limited high quality data shows MPFF may improved bleeding associated with haemorrhoid.
- No study fulfilled the criteria for high quality evidence to recommend use of...
