1 - 2 June 2011

Volume II
(Session 4 – Session 7)
Introduction of the research

- Huge group of LBC in China and constantly increasing.
- The LBC and their problems (education, security, etc.) created risks in China.
- Many attention and policies have responded to the LBC’s problems in China.
- Objectives of this research:
  To investigate the causes of left-behind children.
  To analyze the impact of left-behind children on the social, economical and political aspects of Chongqing.
  To examine the current initiatives by municipality government.
  To make recommendations that can be taken by government in addressing this issue.
