Creativity is not just a favourable trait to embrace but an essential in the development of every field. The articles in this book showcase creativity in developing education. To this end, three aspects of creativity make up the book: its use in pedagogy, its enablers and its measurement. The articles are written by a number of experts, bringing forth compelling topics such as the flipped classroom, Kahoot, and using sports and Hollywood films to foster creative thinking. Case studies featured exhibit the practical ways in which the concepts introduced may be applied. This publication provides invaluable insight and guidance to readers in designing strategies that will help unleash maximum creativity at their learning institutions.
Contents

IPPTN Higher Education Series ix
Preface xi
Acknowledgements xiii

Introduction
Glenda Crosting, Munir Shuib & Shukran Abdul Rahman xv

Section 1
CREATIVITY IN PEDAGOGY

Gamification in Cooperative Learning Activity to Teach English Phonic Symbols
Prakash Veeloo & Munir Shuib 3

The Emergence of Flipped Classroom as a Teaching Pedagogy: Unravelling the Truth in a Pharmacy Course
