OP0007 What if all cancer patients in Malaysia had access to the best available care: How many deaths are avoidable?

DOI: http://dx.doi.org/10.1016/j.ejca.2014.03.025

Abstract

Less pitfalls and variation in population based cancer survival comparisons within the European Union: Lessons from colorectal cancer patients in neighbouring regions in Denmark and Germany – The Fehmarn Belt project

Tumour vasculogenic mimicry is associated with poor prognosis of human cancer patients: A systematic review and meta-analysis

Internet-based technologies to improve cancer care coordination: Current use and attitudes among cancer patients
