FULL CHAPTER REVIEW

October 09, 2013

Editor's comments

Dear authors,

I kindly advise you to address the following remarks and modify your chapter accordingly:
1. Title should be more specific and summarize the exact approach presented.
2. Tables and figures provided should clearly indicate the source.
3. The authors should make an effort to reduce the chapter length, since the current version exceeds by large the maximum number of pages suggested by Intech. Besides, some reorganization of the material compiled would benefit the readability/perception of your manuscript.
4. Conclusion might be more specific and only few lines with the main outcome of your research. An overall discussion or final summary presenting the main contribution of the chapter would be of great help for readers.

Kindest regards

The Book Editor requires you to make the suggested changes.

Sincerely yours,

Aleksandar Lazinica, CEO
