AN ANALYTICAL STUDY ON THE INTELLECT, THE UNSEEN AND REVELATION IN THE QUR’ĀN

One of the main ideological and intellectual issues in Islamic studies is related to the connection between the intellect, the unseen and revelation. This article aims to prove the complementary relationship between the reason, unseen and revelation because they are not different from each other. These three concepts are important and they will be discussed through three aspects: the realities of the unseen in the Qur’ān, the relationship between the intellect and the unseen; how the intellect needs the unseen; the intellect’s (mind’s) role in understanding the unseen. Furthermore, the author is going to present the efforts Muslim scholars in this domain.
