Dear Dr. Abdul-Aziz,

Manuscript ID JME-2015-0353 entitled "Intestinal myiasis in a Malaysian patient caused by larvae of <i>Telmatoscopus albipunctatus</i> (Diptera: Psychodidae)" which you submitted to the Journal of Medical Entomology, has been reviewed. The comments of the reviewer(s) are included at the bottom of this letter.

The reviewer(s) have recommended publication, but also suggest some minor revisions to your manuscript. Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript.

Additional to the comments provided by the reviewers below, it will be necessary for you to update the Genus that you are using based on information provided by a Psychodid specialist. The valid name, according to the specialist, is Psychoda albipunctata Williston, 1893. However, the specialist does concede that, Clogmia is the most commonly accepted generic placement, following Duckhouse (1978). Please decide which you would prefer to use and change the manuscript accordingly. Telatoscopus is not an acceptable use.

I also suggest that you revise the manuscript according to the Short Communication submission afforded by the Journal, as this is really a report of a type of myiasis, rather than a research article.

To revise your manuscript, log into https://mc.manuscriptcentral.com/medent and enter your Author Centre, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision." Your manuscript number has been appended to denote a revision.

You may also click the below link to start the revision process (or continue the process if you have already started your revision) for your manuscript. If you use the below link you will not be required to login to ScholarOne Manuscripts.
