He studied medicine and underwent postgraduate and sub-specialty training at University Malaya Medical Centre. He was an academic staff at Department of Paediatrics, Faculty of Medicine, University Malaya, Kuala Lumpur for 12 years, from 2007 to 2019. In addition to teaching and training both undergraduate and postgraduate students, Dr Tay has published widely in both national and international peer-reviewed academic journals. He has received research training in neurology and hepatology. He enjoys traveling, walking and reading in his free time.

Dr Lum Su Han is a consultant paediatric haematologist at Great North Children's Hospital, Newcastle upon Tyne, United Kingdom. She studied medicine and received her paediatric training and fellowship in paediatric oncology and haematology at the Faculty of Medicine, University Malaya, Kuala Lumpur. She is currently working at Great North Children’s Hospital, Newcastle upon Tyne, United Kingdom. Dr Lum has published widely in both national and international peer-reviewed academic journals. She is currently a member of the Global Clinical Scholars Research Training Program and the Rare Diseases Clinical Research Network Program. Her major research interest relates to studying haematopoiesis and optimising transplantation strategies for severe inherited haemolytic anaemias.

The Textbook of Paediatrics and Child Health is the only textbook in Paediatrics in Malaysia to be written mostly by experienced teachers and experts from local universities and Ministry of Health, Malaysia. It covers core subjects in clinical pediatrics, child health promotion and prevention. The textbook is largely written in point form and includes tables, diagrams, clinical photographs, and case scenarios, making it easy and enjoyable to read and learn from. This textbook is relevant to medical students in Malaysia, as well as junior doctors and paediatric trainees.
